

OLD METHOD

SHM CONTROLS

Interested in saving money
on your heating bills?

A smart boiler control system that:

- **Reduces your energy costs** – proprietary software maximizes system efficiency
- **Saves on building maintenance** – reduce callouts and repair time
- **Retrofits easily in older buildings** – IoT Wireless sensors
- **Has a low upfront cost** – fits the operating budgets of small to medium buildings

Energy Saving Smart Boiler Control System

- Remote monitoring and control helps diagnose problems quickly
- Adaptive-predictive software maximizes building efficiency and reduces energy bills
- 24/7 monitoring of critical systems with email alerts for issues and failures
- Manage multiple properties
- Secure web interface
- Works with all boiler types

“In the first year after installing the controller we saved 40% on our gas expense, which equalled \$11,000.”

E.L., VANCOUVER, BC – Owner
29 UNIT APARTMENT BUILDING

“Now the boiler doesn’t run crazy. The tenants are happy, I’m happy myself because I no longer have headaches.”

I.K., VANCOUVER, BC – Manager
18 UNIT APARTMENT BUILDING

“I like controlling the boiler using my tablet. I can see the temperatures in the suites and receive alerts when the boiler breaks down!”

P.H., Vancouver, BC – Owner-manager,
18 UNIT APARTMENT BUILDING
