

What if your building could tell you when something is wrong?

SHMCONTROLS

A smart boiler control system that:

- Addresses issues more quickly – 24/7 monitoring and alerts
- Helps solve challenging heating issues – Advanced diagnostic tools
- Retrofits easily in older buildings – IoT Wireless sensors
- Has a low upfront cost – fits the operating budgets of small to medium buildings

Energy Saving Smart Boiler Control System

- Remote monitoring and control reduce callouts and repair time
- Adaptive-predictive software maximizes building efficiency and reduces energy bills
- 24/7 monitoring of critical systems with email alerts for issues and failures
- Manage multiple properties
- Secure web interface
- Works with all boiler types

“In the first year after installing the controller we saved 40% on our gas expense, which equalled \$11,000.”

E.L., VANCOUVER, BC – Owner
29 UNIT APARTMENT BUILDING

“Now the boiler doesn’t run crazy. The tenants are happy, I’m happy myself because I no longer have headaches.”

I.K., VANCOUVER, BC – Manager
18 UNIT APARTMENT BUILDING

“I like controlling the boiler using my tablet. I can see the temperatures in the suites and receive alerts when the boiler breaks down.”

P.H., Vancouver, BC – Owner-manager,
18 UNIT APARTMENT BUILDING
